

NGO Project Management System

Complete Integrated Source Code (Database, Backend & Frontend)

1. Database Schema (MySQL)

This schema establishes the relationship between projects and their associated media.

```
-- Step 1: Create Projects Table
CREATE TABLE projects (
  id INT PRIMARY KEY AUTO_INCREMENT,
  title VARCHAR(255) NOT NULL,
  description TEXT NOT NULL,
  status ENUM('Ongoing', 'Completed', 'Upcoming') NOT NULL,
  start_date DATE,
  end_date DATE,
  location VARCHAR(255),
  created_at DATETIME DEFAULT CURRENT_TIMESTAMP,
  updated_at DATETIME DEFAULT CURRENT_TIMESTAMP ON UPDATE CURRENT_TIMESTAMP
);

-- Step 2: Create Project Images Table
CREATE TABLE project_images (
  id INT PRIMARY KEY AUTO_INCREMENT,
  project_id INT,
  image_url VARCHAR(255) NOT NULL,
  uploaded_at DATETIME DEFAULT CURRENT_TIMESTAMP,
  FOREIGN KEY (project_id) REFERENCES projects(id) ON DELETE CASCADE
);
```

2. Backend Development (Admin Dashboard)

File: manage_projects.php

Admin interface to add projects and upload multiple images.

```
<?php
include 'db.php';
session_start();

// Ensure admin is logged in (Logic from previous module)
if(!isset($_SESSION['admin'])) { header("Location: login.php"); }

if(isset($_POST['save_project'])) {
    $title = mysqli_real_escape_string($conn, $_POST['title']);
    $desc = mysqli_real_escape_string($conn, $_POST['description']);
    $status = $_POST['status'];
    $s_date = $_POST['start_date'];
    $e_date = $_POST['end_date'];
    $loc = $_POST['location'];

    $sql = "INSERT INTO projects (title, description, status, start_date, end_date,
location)
        VALUES ('$title', '$desc', '$status', '$s_date', '$e_date', '$loc')";

    if(mysqli_query($conn, $sql)) {
        $project_id = mysqli_insert_id($conn);

        // Handle Multiple Image Uploads
        if(!empty($_FILES['project_images']['name'][0])) {
            foreach($_FILES['project_images']['name'] as $key => $val) {
                $image_name = time() . "_" . $_FILES['project_images']['name']
[$key];
                $target = "uploads/" . $image_name;
                if(move_uploaded_file($_FILES['project_images']['tmp_name'][$key],
$target)) {
                    mysqli_query($conn, "INSERT INTO project_images (project_id,
image_url) VALUES ('$project_id', '$target')");
                }
            }
        }
        echo "<script>alert('Project Added Successfully');</script>";
    }
}
?>

<!DOCTYPE html>
<html>
<head><title>Admin - Manage Projects</title></head>
<body>
```

```
<h2>Add New Project</h2>
<form method="POST" enctype="multipart/form-data">
  <input type="text" name="title" placeholder="Project Title"
required><br><br>
  <textarea name="description" placeholder="Description" required></
textarea><br><br>
  <select name="status">
    <option value="Ongoing">Ongoing</option>
    <option value="Completed">Completed</option>
    <option value="Upcoming">Upcoming</option>
  </select><br><br>
  <input type="date" name="start_date"> <input type="date"
name="end_date"><br><br>
  <input type="text" name="location" placeholder="Location"><br><br>
  <input type="file" name="project_images[]" multiple><br><br>
  <button type="submit" name="save_project">Save Project</button>
</form>
</body>
</html>
```

3. Frontend Development (User View)

File: projects.php

Displays projects with status badges and an automated impact section.

```
<?php include 'db.php'; ?>
<!DOCTYPE html>
<html>
<head>
  <title>Our Projects</title>
  <style>
    body { font-family: sans-serif; }
    .grid { display: flex; flex-wrap: wrap; gap: 20px; padding: 20px; }
    .card { border: 1px solid #ccc; width: 30%; padding: 15px; border-radius:
8px; }
    .card img { width: 100%; height: 200px; object-fit: cover; }
    .badge { color: white; padding: 4px 8px; border-radius: 4px; font-size:
10pt; }
    .Ongoing { background: orange; } .Completed { background:
green; } .Upcoming { background: blue; }
    .impact { background: #2c3e50; color: white; padding: 40px; text-align:
center; }
  </style>
</head>
<body>
  <h1 style="text-align:center;">Our Initiatives</h1>
  <div class="grid">
    <?php
      $res = mysqli_query($conn, "SELECT p.*, (SELECT image_url FROM
project_images WHERE project_id = p.id LIMIT 1) as img FROM projects p");
      while($row = mysqli_fetch_assoc($res)) {
        ?>
        <div class="card">
          <span class="badge <?php echo $row['status']; ?>"><?php echo
$row['status']; ?></span>
          
          <h3><?php echo $row['title']; ?></h3>
          <p><?php echo substr($row['description'], 0, 80); ?>...</p>
          <p><small> 📍 <?php echo $row['location']; ?></small></p>
        </div>
        <?php
      }
    ?>
  </div>

  <div class="impact">
    <h2>Our Global Impact</h2>
    <div style="display:flex; justify-content: space-around;">
```

```
<div><h1>500+</h1><p>People Helped</p></div>
<div><h1>300+</h1><p>Volunteers</p></div>
<div><h1>$50k+</h1><p>Funds Raised</p></div>
</div>
</div>
</body>
</html>
```
